

Project Engineer

Hickory Run Energy, LLC (HRE) is constructing a new 1,000 MW gas-fired, combined cycle electric generating station in New Castle, PA. Tyr Energy Construction Management, LLC (TECM) is an HRE affiliate and currently has a seven-member construction management team overseeing the construction of the facility. TECM is looking to add a Project Engineer to assist the other members of the team. This is an excellent opportunity to gain field experience and exposure to the engineering and construction of power generation facilities. This is a full-time, contract position located at the construction project site with an immediate start and a term of 12 months.

Under the general guidance from senior personnel, the Project Engineer will be expected to perform the following duties:

- Review vendor drawings, design basis documents, technical specifications, project schedules, and miscellaneous technical data and documentation regarding the power plant and related infrastructure.
- Assist in the administration of contracts for equipment supply, engineering services, and construction services.
- Create and maintain systems to track the progress of milestones, requirements, and obligations in various contracts and environmental permits.
- Attend progress meetings and prepare progress reports.

The Project Engineer is required to possess the following qualifications:

- Electrical engineering or electrical engineering technology degree.
- Three to five years of professional experience, preferably working for an electric utility, plant owner or operator, engineering firm, large industrial equipment vendor, or related industry firm. (Candidates with less experience will be considered if the candidate has exceptional academic credentials.)
- Intermediate or advanced proficiency with using Microsoft Excel.
- Exceptional organizational skills and ability to think logically and analytically.
- Attentive to detail.
- Ability to work collaboratively with other team members and with minimal supervision.
- Project management skills, with the ability to communicate effectively and efficiently in English through both oral and written communications.
- Ability to work effectively and efficiently under tight deadlines.
- Results orientation, working with integrity across cultures and disciplines.

Interested candidates should submit resume and cover letter via email to:
